Cnild-Training.

It is not fair to a small child for the parents or nurse to be careless about the little things that develop thoughtfulness, self-reliance and self-control in a child. Self-control is a characteristic absolutely essential to manhood or womanhood, and it is not learned in a day. It is the result of patient teaching and training through all the long years of babyhood and childhood.

Stephen climbed into the stage, the Buffalo Express, and during the drive gave monosyllabic answers to Mr. Benton's many questions. He remembered but two facts of the worthy gentleman's conversation-namely, that a cabin had been built for him high up on the ridge and that he would have to mals and skins is that they do not cook his own meals until some one could be found to do it for him.

The next morning found him installed in his hermitage, and rebelone on a farm at Palm Beach which lion more bitter than wormwood measures 18 feet in length and is said gnawed at his heartstrings. What pleasure remained in life separated from all that made it worth while? His career was ended! He realized this when he turned the key in his office door. Obviously fate meant to torture him with loneliness until life became unbearable, and he would welcome the journey's end.

Two months after his arrival he stood at the door of his cabin and watched the menacing gray-black pall of clouds as it rose like heavy smoke from behind the snew-cowled peaks. Thunder bellowed and lightning zigzagged across the heavens, while the wind lashed the patriarchal trees until they groaned,

"You must dismount and we will

make for my cabin." Grasping the horse's bridle, he led the way, the girl following without comment. They entered the cabin and Stephen lit the lamp, then threw another log on the fire. The rain descended in torrents, beating against the door like a frenzied fiend.

The girl shivered. "You cannot imagine how relieved I was to hear your call. I felt instinctively that this was the wrong trail, yet hoped for a familiar landmark to guide me. You see, I teach school on the ridge and live at Prescott. ORIGIN OF THE HEEL.

It is said that the heels now worn on shoes had their origin in Persia, where they took the form of flat wood on sandals to raise the feet and protect them from the hot sands.

It was many years afterward that this fashion was introduced into Venice, but the reason for its adoption in this case is said to have been quite different. Here the originators of the fashion were jealous husbands who reasoned that their ladies thus equipped would not venture far outside the precincts of their dwelling. These heels were called

'clogs," and in order to satisfy the vanity of the wearers and perhaps to sweeten the pill-that is, the discomfort of appearing in them-they were elaborately adorned, sometimes being incrusted with gold and silver. The height of the clogs determined the rank of the wearer .- Harper's

Give Away Your Wash Board!

Wives, will you please call your husbands' attention to this Vacuum Washing Machine, which is a more remarkable discovery, not an invention, than the flying machine. Come and see it in operation here to-day. You put it in the wash boiler with clothes, water and soap.

What It Does and How

This Vacuum Washer sucks up five gallons of suds and floods it

over the clothes every five minutes. In twenty minutes your clothes are snowy white and clean. What it does is, actually takes the dirt out, without rubbing, without a washboard, without fuss- \$2.50
